## EDUCATION

### Metropolitan State University

St. Paul, MN

Bachelor of Science in Computer Science GPA: 3.75

Minor in Cybersecurity

Graduated Dec 2025

**Awards/Honors:** MLT Career Prep Fellow & Ascend Scholar, Wallin Scholarship

**Relevant Coursework:** Data Structures & Algorithms, OOP, Network Security, Computer Architecture, Database Management.

## TECHNICAL SKILLS

### Programming & Scripting Languages:

Python, Java, C#, SQL, JavaScript, PowerShell, Bash

### Integration & API Technologies:

REST APIs, Web Services, XML, JSON, Postman, SOAPUI, SFTP

### Data Analysis & Databases:

SQL Querying, Data Analysis, Data Validation, Microsoft Excel (Pivot Tables, VLOOKUP, XLOOKUP), SQLite

### Enterprise Applications & Tools:

Salesforce Service Cloud, Jira, VMware, Windows Server, Active Directory, Linux, Microsoft Office Suite

## WORK EXPERIENCE

### HHAeXchange

Bloomington, MN

Technical Customer Care Representative

Oct 2025 – Present

- Resolved complex technical issues while maintaining a **95% CSAT**, by troubleshooting application configuration, billing systems, and user management using Salesforce workflows.

### Metropolitan State University – Cyber Clinic

St. Paul, MN

Cybersecurity Consultant/Risk Assessor

Aug 2024 – May 2025

- Conduct cybersecurity vulnerability assessments for small businesses, nonprofits, K-12 schools, and government organizations in Minnesota.
- Collaborate with clients to deliver actionable insights and enhance their overall cybersecurity resilience.
- Perform security audits and provide recommendations for optimizing usage of Microsoft security tools, demonstrating a proactive approach to cybersecurity enhancement.

### Data Recognition Company

Data analyst

- Reviewed and validated large volumes of structured and unstructured data to ensure accuracy and completeness.
- Performed data cleansing, normalization, and quality assurance before system processing.
- Assisted with identifying workflow improvements that reduced manual processing and increased data quality.

### Securitas

Owatonna, MN

Part-time Security officer

Feb 2023 – Mar 2026

# FARAH FARAH

- Monitored facility security systems and responded to incidents in real time, improving threat detection and response readiness by enforcing access control and documenting security events.
- 

## NOTABLE PROJECTS

---

### PTO Management System | Application Integration & Support Developer

- Developed a full-stack PTO application using **React**, **Node.js**, and **SQLite**.
- Built **REST APIs** and role-based workflows for employees and managers.
- Troubleshoot application and database issues to ensure data accuracy.
- Validated system functionality through testing and **SQL** queries.

---

### Information Security Project | Systems & Technical Support Analyst

- Diagnosed system and network issues using Wireshark and Windows tools.
- Analyzed logs to identify root causes and validate system functionality.
- Documented findings and recommended technical improvements.
- Verified system stability after implementing security configurations.

---

### B&B Watchlist App | Software & API Integration Developer

- Developed a **JavaFX** application with real-time cryptocurrency tracking.
- Integrated third-party REST APIs to retrieve live market data.
- Tested **API** responses and resolved application issues.
- Improved data validation and overall user experience.

---

### Fleet Management System | Application Developer & Data Analyst

- Developed a **C#/.NET** fleet management application with **SQLite**.
- Designed database features for trucks, drivers, and maintenance records.
- Validated application data and generated automated reports.
- Troubleshoot application and database issues to improve performance.
